	Title
1	Two step method for correcting spelling of a word or phrase in a document
2	Method and system for interpreting multiple-term queries
3	Methods and apparatus for employing usage statistics in document retrieval
4	Method and system for intelligent spellchecking
5	Process management using component thermal-hydraulic function classes
6	Methods and apparatus for providing search results in response to an ambiguous search query
7	Methods and apparatus for displaying and replying to electronic messages
8	Sentence processing method and apparatus
9	Systems and methods for searching using queries written in a different character-set and/or language from the target pages
10	Spelling and grammar checking system
11	Abbreviating and compacting text to cope with display space constraint in computer software
12	Method and compiler for rearranging array data into sub-arrays of consecutively-addressed elements for distribution processing
13	Ergonomic man-machine interface incorporating adaptive pattern recognition based control system
